

Carlisle Area School District

Empowering Every Learner

Email notification to families, September 4, 2023

Dear Carlisle Area School District Parents,

District Administrators met this afternoon with the team of security specialists assisting our District after the possible security concern related to our computer network last week. While our investigation into this incident is ongoing, they informed us that there is no immediate threat to our system, and we can reconnect to the internet. I'm pleased to share with you that we expect school to be held normally tomorrow, Tuesday, September 5, 2023.

Our technology department members will be in our schools throughout the day tomorrow to assist staff and students who may need assistance resetting passwords or with any other technical issues. We have asked staff to provide grace to students who were unable to access online resources or complete online assignments since being offline this past Thursday. In addition, we ask for your patience with staff, who will be catching up on email communications as well.

This matter is still an active investigation, and because of this, we are somewhat limited in what we're able to share about this matter. We do appreciate all of your patience.

We look forward to seeing our students tomorrow.

I hope you had a fantastic holiday weekend.

Colleen M. Friend, Ed.D.
Superintendent
Carlisle Area School District
